TRANSMITTAL LETTER

Dear Sir:

Transmitted herewith are an Information Disclosure Statement and Forms PTO-1449 (33 pages), and some of the cited references for filing in connection with the above-identified application. Because this Information Disclosure Statement is filed prior to receipt of a first office action on the merits in the above-referenced application, no fee is due. However, should it be determined that a fee for filing these papers is required, the Commissioner is authorized to charge Deposit Account No. 06-1050, as stated below:

☒ The Commissioner is hereby authorized to charge any fees that may be due in connection with this paper or with this application during its entire pendency to Deposit Account No. 06-1050. A duplicate of this sheet is enclosed.

Respectfully submitted,

Stephanie L. Seidman
Reg. No. 33,779

INFORMATION DISCLOSURE STATEMENT
IN ACCORDANCE WITH 37 C.F.R. 1.97-1.98

Dear Sir:

Because this Information Disclosure Statement is filed before the receipt of a First Office Action on the Merits for the above-captioned application a fee is not required. If no proper payment is enclosed herewith, as by a check being in the wrong amount, unsigned, post-dated, otherwise improper or informal, or even entirely missing, the Commissioner is authorized to charge the unpaid amount to Deposit Account No. 06-1050.

In accordance with the duty of disclosure imposed by 37 C.F.R. §1.56 to inform the Patent Office of all references known by Applicant or Applicant's representative that may be material to the examination of the subject application, Applicant's representative hereby provides this Information Disclosure Statement that is prepared in accordance with 37 C.F.R. §§1.97-1.98. Form PTO-1449 (33 pages) and hard copies of the references marked with a double asterisk **, in the "Examiner Initial" column, are provided herewith in connection with the above-captioned application. In accordance with 37 C.F.R. §1.98(d), copies of the references listed on the Form PTO-1449, not marked with double asterisk, are not provided herewith as they have been previously

CERTIFICATE OF MAILING BY "EXPRESS MAIL"
"Express Mail" Mailing Label Number EV 399295607
Date of Deposit July 16, 2004
I hereby certify that this paper is being deposited with the
United States Postal "Express/ Mail Post Office to
Addressee" Service under 37 CFR §1.10 on the date
indicated above and is addressed to: Commissioner for
Patents, U.S. Patent and Trademark Office, P.O. Box
1450, Alexandria, VA, 22313-1450.

Stephani L. Seidman

provided in connection with U.S. Serial Nos. 09/096,648 and 08/629,822, which are relied upon for an earlier filing date in accordance with 35 U.S.C. §120.

The documents cited on the Forms PTO-1449 are in the English language with the exception of Items BZ, CB, and CW. Items BZ, CB, and CW (European Patent Applications EP0240373, EP0254315 and PCT Patent Publication WO 94/24300 respectively) are in the French language and were previously supplied with English language Derwent abstracts (Item No. GG, GH, and FAA, respectively). Hence, in accordance with the requirements of 37 C.F.R. 1.98, as amended effective March 16, 1992, no further explanation of the listed items is necessary.

The Examiner's attention is directed to the cited reference Oberle *et al.* (*Biochimica et Biophysica Acta* (2004) 1676:223-230). Oberle *et al.* describes methods for delivering artificial chromosome expression systems (ACEs) to cells. Specifically, Oberle *et al.* demonstrates that when cells are treated with ultrasound energy and the cationic lipid SAINT-2 or DOTAP prior to contacting them with ACEs, the ACEs are delivered into the cells. Oberle *et al.* states that, prior to its publication, there was no suitable procedure for delivering ACEs into cells because the size of the ACEs was too large to allow internalization of ACEs complexed with cationic lipids or polymers (see, *e.g.*, Abstract at page 223 and page 224, col. 1, para. 3). Oberle *et al.* further states that incubation of ACEs with cationic lipids such as SAINT-2 and DOTAP to prepare ACEs/lipid complexes leads to partial unraveling of the ACEs with a loss of their condensed structure (see page 225, col. 1, para. 2). Oberle *et al.* does not provide any data to support these statements.

The instant application, as well as in U.S. Patent No. 6,025,155, which is a parent application of the instant application, however, describes the introduction of artificial chromosomes, including ACEs, into cells by lipid-mediated transfection (see, *e.g.*, p. 11, lines 26 and 23; p. 23, line 31; p. 33, line 28; p. 48, line 20; p. 49 line 29; p. 83, line 2, and p. 179, line 5 of the instant application).

Applicant also makes known to the Examiner the following U.S. and International applications, which are commonly owned and/or have one or more inventors in common.

Although these documents and information are made known to the Patent and Trademark Office in compliance with Applicant's duty of disclosure, such disclosure is not to be construed as an admission by Applicant or Applicant's representative that any of the references, singly or in any combination thereof, is effective as prior art against the subject application. In accordance with 37 C.F.R. 1.97(h), the filing of this Information Disclosure Statement shall not be construed to mean that a search has been made or that no other material information as defined in 37 C.F.R. 1.56(b) exists. Applicant respectfully requests that the Examiner review the foregoing references and information and that they be made of record in the file history of the above-captioned application
